

To Whom It May Concern:

I would like to let you know how incredibly pleased American Health Imaging of Austin is with the work that has been performed to install our new MRI machine by Fry Construction. Jimmy Stevens and the crew of Fry construction is amazing. They were respectful at all times, went out of the way to help with things that were not in their job description and maintained a very professional image for themselves. Jimmy always kept the center clean and was very conscious of keeping the patient area clear of all debris. I would absolutely call them back for other projects or highly recommend them to someone else. Thanks Jimmy and Fry Construction for an outstanding job!

Sincerely,

Audrey Rusin
Facility Administrator
American Health Imaging of Austin
