

I am quite sure our request of our company was unique. Build an MRI suite to accommodate horses weighing up to 1500 pounds to a 5 pound dog. I was impressed with your company's ability to think outside your usual box to come up with creative solutions to complex problems. None of us had done this before and your company was a great partner in solving this problem and creating a functional and practical solution to MRI applications in Veterinary Medicine. I would not hesitate to recommend your company to anyone interested in considering an MRI application in Veterinary Medicine. Again, thanks for the hard work and going the extra mile.

Sincerely,

Jake Hersman, DVM
