

First, I would like to thank you for the successful completion of the recent project here at Campbell Health Systems. The two new Radiographic and Fluoroscopic rooms are a success.

As always, I have found your crews and construction managers to be very professional and competent. Their guidance and suggestions during the construction process have been very helpful.

After the successful completion of the four different projects, I would highly recommend your organization for future construction projects. I have found your planning and implementation to be right on target. Your ability to meet tight timelines caused by vendor delays has been greatly appreciated. The entire construction process from initial planning to completion has been exactly as promised.

Please feel free to list me as a reference at any time. Campbell Health System and I look forward to future building projects with you.

Sheryl Barnes
Director of Radiology
Campbell Health Systems
