

October 21, 2022

Ben,

I am the manager of the radiology department at CHRISTUS Jasper Memorial. Your company recently completed a project for MRI upgrade at our facility. I wanted to let you know how professional and easy it was to work with and around Anthony Contreras.

When we had questions about something or how it was going to be built, he always stopped and took the time to answer and explain. He would ask the techs what would work best for them and try to get it how they wanted for their work environment when the project was over.

Our CT and MRI shares a common/control work area. There were times when the workers would need to be in that area to complete a task. Anthony would work with the techs to make sure of the most convenient time to not interfere with patient care.

Everyday when his crew left, everything was picked up and clean. We never had to worry about tripping or working around their equipment or supplies. Very conscientious of the patients coming in and out of the area.

Having been in several construction projects in our facility, this was by far the easiest and smooth.

KUDOS TO ANTHONY!

Kristi Moss RT(M)
Radiology Manager
CHRISTUS Jasper Memorial Hospital
