Dear Ben:

This letter is to acknowledge the work that your company did in the remodel of our MRI suite and the installation of our new Hitachi magnet.

The work was professional, precise, and on time. Suggestions during installation to keep cost down proved to be invaluable.

I appreciate Jimmy Stevens being on site to move the project along and keep everybody in line. Experience counts.

The physicians of The El Paso Orthopaedic Surgery Group consider this to be a great success. It is a facility in which we can all take pride.

Richard Maxey,
Director of Operations
