

The expansion of our Diagnostic Imaging Department has been a great success. Your staff was able to work in a busy patient car area without any disruption of service. It is amazing they were able to finish on time and under budget. They worked well with changes and made the best of any situation. When unexpected issues did come up they were quick to respond and inform all in the area.

Please let Jimmy Stevens, Shane Wood, Tim Askins, Richard Hanson and Robert Winn know that we appreciate all their hard work and professionalism. They made the job fun. The staff was actually missing them and has been after me to plan additional projects to have them come back. We had an employee of the quarter nomination while they were here and there were several write in votes for Jimmy and Robert.

We will be contacting you about future projects.
