

NORMAN RADIOLOGY SERVICES

I want to congratulate you and your people on the fine job of designing and building our new Open MRI suite. This facility was my first opportunity to build a freestanding Open MRI office from the ground up. Your expertise made the project a great experience that I truly enjoyed.

During the building process, I found that you met your expected timeline for every phase of the project. The construction manager you assigned to our job was delightful. He was considerate to my staff, he kept me informed during the entire process and he was patient when I needed time to consider decisions that needed to be made. Further, I found him to be very knowledgeable, thorough, friendly and professional in all encounters.

Because of you and your staff, building the suite was a pleasant experience that I would happily repeat. I would readily recommend Fry Construction for any medically related building project and I personally hope that another project comes my way and I have the opportunity to work with Fry Construction again.

Wishing You Continued Success!
