

Ben

First off let me compliment you on what pleasure it's been for everyone on our side to work with your people. They've been great and the space looks nice. I really wish you did more than imaging suites!

I need a favor. We're putting together a list of people who we want to work in the building and we'd like to recommend the folks that supplied & installed the main door into Rocky's suite. Am wondering if you can have someone forward that to me?

Thanks and great job to you and your people!

Barry
