

I just wanted to let you know how pleased Methodist Hospital and I have been with your construction work. They are always telling me how professional and nice the superintendents have been on the job. They are willing to answer their questions and communicate with them. The superintendents are also very good at communicating back to me the customer's additional needs and wants.

Your work is done properly and on time. That means a lot to Siemens and our customers. It also makes my job easier.

Fry Construction has done an excellent job of carrying over Siemens commitment to deliver the customer a quality product.

Keep up the good work!

Pauline Komorny-Raymond
Senior Project Manager
Siemens Medical Solutions
