

Texas Pediatric Surgery Center

We wanted you to know how much we appreciated Jimmy Stevens, on the job with us. Jimmy was always respectful of our time, our patient schedules, and the deadline for when we needed the job done.

We just completed our big AAAHC surgery for ambulatory healthcare organizations. This is like JCAHO for hospitals. We were very concerned about the appearance of our Center, and the building code regulations. The construction was completed in a timely manner with great results.

Jimmy went out of his way to make sure we were happy with the work, and anything else that needed to be done. Because of Jimmy's genuine interest in our Center and the good work he provided, we contracted with Fry for some additional services before our survey.

I would highly recommend Fry Construction Company because of the great service that I received from Jimmy and Tim McCoy, as well as the quality of the work that was done. I am currently looking at some additional work for Fry to do for us.

Thank you again for the great service,

Nancy Kilekas, RN, BS, CNOR, CASC
Administrator
