

TEXAS TECH UNIVERSITY SYSTEM
Facilities Planning and Construction

I am pleased to commend David Brown for a job well done on Texas Tech University's Experimental Sciences Build Out and MRI installation. David served as Fry Construction's Construction Superintendent. David exhibited himself as a proactive, technically competent individual. His outstanding performance resulted in an excellent and timely facility to support critical academic research programs.

David is a reliable, self-starter and was a valuable member of a high performing team focused on producing excellent facilities that met our campus clients' needs. Equally important, he coordinated and worked well with all our other team members.

Please feel free to contact me at 807-789-2976 or debbie.griffin@ttu.edu for additional information.
