

VA

U.S. Department of Veterans Affairs

9/27/2017

Mr. Fry,

My name is Tom Henderson and I am the Supervisor of the Biomedical Engineering Department at the VA Hospital in Amarillo, TX. I have worked in the health care industry for 20 plus years, mostly in the private sector. As you are well aware of we had a difficult issue with the remodeling of our MRI suite and the vendor of the MRI. Your company was very professional and helpful in the completion of this project. I have to say I have never experienced a contractor that has been so helpful, honest, fair and provided a great quality product. Many of these accomplishments are due to the foreman, Donnie Trumper . Donnie always provided solutions to any of our problems/issues. I witnessed Donnie's interactions with some of our Veterans and he was very helpful and respectful with them and their issue that were not even his concern. I would like to thank you and Donnie for providing us such a great experience, construction projects are usually not enjoyable, and you have definitely set the bar high.

Tom Henderson
